SinSco Construction and Structural testing services

A Singapore Scotland Company

SinSco Group of companies were established in 2006 as a fully versatile procurement, Project and Construction management, Marine and Offshore service provider and consultancy group of companies concentrating on full scale EPC projects and services within Asia Pacific.

As part of our Project management structure and services, SinSco Project Management has recently joined forces with one of Singapore's most renowned and technologically advanced accredited Engineering and Inspection companies to enable us to fully integrate our own Structural construction and Inspection personnel with trained and experienced testing engineers to provide a consolidated, reliable and quality construction and inspection service covering all aspects of Marine, MODU and Offshore Construction with specific knowledge of all industry standard and Classification society construction codes.

Through our many years of project works and previous construction processes from Semi Submersible, Jack up, Tender barges, Modular Drilling equipment sets and numerous vessel and DES upgrade and refurbishment projects, we identified the lack of reliable independent structural support services throughout Singapore and Asia in support of individual project requirements.

Through a long and determined process, SinSco now has the dedicated ability to provide a fully accountable in house construction and testing division in support of our own ongoing independent projects as well as being able to offer these specific services to our clients throughout Asia.

SinSco Group has a fully diversified workforce which covers all aspects of industrial, marine and MODU construction, repairs and upgrades which enables us to provide a full EPC service including structural testing, installation and completion.

TECHNICAL PROFICIENCY

SinSco and SinSco associated employees each possess specific experience and qualifications for their role and have extensive exposure in their field of experience in continued training, supervision and inspection of various projects including, Marine, oil and gas industries, power sector, ship building / repair and other general engineering industries.

As our standard, we provide our clients with quality and timely service requirements, achieved through utilizing experienced professional Engineers, Inspectors, Technicians and Material Doctors who are all fully certified under various certification bodies such as ASNT, PCN, PED, ACCP, AWS & CSWIP with many of these personnel being certified trainers in all aspects of structural inspection and result interpretation.

QUALITY CERTIFICATES

ISO 17025 QUALITY MANAGEMENT SYSTEM CERTIFICATE FROM SAC SINGLAS (LA-2009-0439-D)

ASNT NDT LEVEL III / ACCP LEVEL III / PED LEVEL III

CSWIP WI 3.2 / PCN RI, UT, MT, PT & MT

SinSco Group provides a fully comprehensive scope and range of construction and testing services in conjunction with our structural supervisory and QA/QC services.

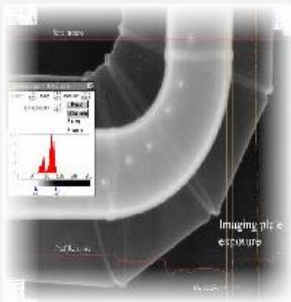

SERVICES »

- » Conventional Non-Destructive Testing
- » Ultrasonic Testing (Flaw Detection)
- » Radiographic Testing
- » Magnetic Particle Testing
- » Liquid Penetrant Testing
- » Ultrasonic Thickness Gauging (Classification requirement)
- » Rope Access Technician (IRATA Certification)
- » Proposal Renewal Planning and Specification
- » Tank and Coating Assessment
- » Post Weld Heat Treatment
- » Hardness Testing
- » Ferrite scope Testing
- » Leak Testing
- » Holiday Detection Inspection
- » Video scope Inspection
- » Advanced Non-Destructive Testing
- » Phased Array Ultrasonic Testing
- » Eddy Current Testing
- » Time of Flight Diffraction
- » Automatic Ultrasonic Testing
- » IRIS
- » Positive Material Identification
- » QA/QC (Certified Welding Inspector)
- » Welding Procedure and Consultancy
- » NDT Level III Consultancy Services
